

# FlowTrace + PhaseTrace

PhaseTrace and FlowTrace can be combined in a single production string. This will provide:

- Continuous data on zonal fluid type inflow
- Zonal contribution of the total well production

As for their individual applications, the benefits of PhaseTrace + FlowTrace are:

- No additional well interventions
- No additional personnel at the wellsite
- No changes to operational procedures or completion design
- No added rig time at the wellsite

With a lifetime of over 5 years, PhaseTrace + FlowTrace inflow tracers provide quantitative data to inform production management decisions.
